

Etiler Mahallesi Ahular Sokak No:10 Beşiktaş / İstanbul PHP 222C Double-Deck Type Covered Car Lift

Construction year : **2018**

Employer : **Mercedes Benz Mengerler Türk Ticaret A.Ş.**

Architect : **Boyturun Architects**

Supplier : **Parkolay**

Model : **Parkolay PHP 222C**

Application : **Automobile Showroom**

The customized **Parkolay PHP 222C** solution installed in this project, offers a pleasant and convenient experience for its Users. The two-way car lift concealed in the middle of the showroom's garden allows the vehicles to be transported between its floors. While the upper platform rises to reach the upper floors of the showroom, the car lift's underground platform rises to the ground level to welcome a new vehicle or to deliver a parked one. This successful architecture and engineering solution is provided with a monitor at the lower platform to follow-up the movements at the ground floor, a press and hold button for safe operation, and drainage channels with isolation around the pit borders. The system has a CE and 2006/42/EC compliance certification.

Etiler Mahallesi Ahular Sokak No:10 Beşiktaş / İstanbul, Turkey
